KNOW ABOUT US

Keen 2B Green Pty Ltd stands out as a leading solar energy enterprise in South East Queensland, specializing in cutting-edge solar and environmental solutions for residences and businesses spanning the expansive regions of the Gold Coast, Brisbane, Sunshine Coast, and Northern New South Wales. Our expertise in Solar and Battery Storage, honed since 2009, distinguishes us as a local powerhouse with a wealth of experience in delivering and installing premium solar power products across the broader area.

At Keen 2B Green, we exclusively employ top-tier products sourced from reputable companies. We take pride in our customer-centric approach, providing friendly, personalized, and non-binding advice to guide you in selecting an optimal Solar Power System tailored to your specific needs and budget. We simplify the decision-making process for our customers by leveraging our market insights to choose the highest quality, most reliable, and best-supported solar products available. This ensures not only immediate benefits but also years of peace of mind, knowing that your solar system is a sound investment for future savings. To witness the quality of the solar products we endorse, we invite you to explore our showroom firsthand.

Beyond product excellence, we offer comprehensive advice on State and Federal Government Solar rebates and incentives, maximizing your potential savings on the new system. As part of our personalized service, our consultants conduct on-site assessments to evaluate your property's suitability for solar installation. We provide financial return projections, performance estimates, and transparent advice, ensuring you have all the necessary information to make informed decisions. Our installation operations adhere to stringent procedures, guaranteeing a superior standard of workmanship. We utilize only the finest components, ensuring the durability and efficiency of your solar system. Keen 2B Green is deeply committed to fostering a sustainable solar industry in Queensland and across Australia. We maintain close partnerships with premier wholesale associates and manufacturers, positioning ourselves as a formidable presence in the market.

OUR TEAM

MISSION

At Keen2bgreen, our mission is to catalyze the global transition to clean, sustainable, and renewable energy solutions through the widespread adoption of solar technology. We are dedicated to empowering individuals, businesses, and communities to reduce their carbon footprint, save on energy costs, and contribute to a greener planet. Through unwavering commitment to innovation, environmental stewardship, and exceptional customer service, we aim to make solar energy accessible, affordable, and essential for a sustainable future.

VISION

Keen2bgreen envisions a world where solar energy is the cornerstone of sustainable living, powering homes, businesses, and entire communities. We aim to be at the forefront of this transformation, leading the industry with innovative solar technologies, comprehensive solutions, and a commitment to environmental responsibility. Our vision is a world where solar panels adorn rooftops, open spaces, and even portable devices, harnessing the abundant power of the sun to create a cleaner, brighter, and more sustainable future for generations to come.

Keen 2B Green is an official Clean Energy Council Approved Solar Retailer.

What is a Clean Energy Council Approved Retailer?

The Clean Energy Council (CEC for short) is the peak body for the clean energy industry in Australia and represents and works with hundreds of leading businesses operating in solar, wind, energy efficiency, hydro, bioenergy, energy storage, geothermal, and marine along with more than 5000 solar installers.

They developed the Code of Conduct to provide consumers peace of mind that they have made the right choice when deciding on which company to purchase a solar power system from by selecting a retailer that is committed to superior quality and service. The Code of Conduct was also created to weed out a lot of the unscrupulous solar companies and installers that have plagued the industry over the years with poor products, workmanship, and customer service and support.

Why choose an Approved Solar Retailer?

Approved Solar Retailers:

have been approved by the Clean Energy Council as demonstrating their commitment to responsible sales and marketing activities, and solar industry best practice provide a five-year, whole-of-system warranty will ensure a Clean Energy Council accredited installer sets up your system

The Approved Solar Retailer program is voluntary and approved by the Australian Competition and Consumer Commission. The program aims to lift the bar higher than the minimum requirements set by law and to bring about a better standard of service within the solar industry.

If you need a quote for a new quality solar system from a company you can trust, give Keen 2B Green a call at 1300 303 783 or fill out our [inquiry form here](#).

Do you have an existing solar system?

How did you hear about us

The batteries we offer under the scheme include the Enphase AC batteries, LG Chem and Tesla. These come with a range of storage and price options to suit the usage at your property as well as your budget. We also offer a diverse range of quality panels and inverters, see below for details on packages offered under the scheme. We have packages to suit any budget. Whether you are looking at simply spending the \$13,000 finance on a battery and solar system, or if you have a bit more flexibility with your finances, we can accommodate your requirements.

When booking your Solar and Battery Storage through Keen 2B Green you can rest easy, as all of our installs come with a premium 10 year workmanship warranty. You will also receive ongoing support and communication regarding your battery and solar, right here from our office in Burleigh Heads. Keen 2B Green also offer a free on-site consultation, to give you all the information you need.

Queensland Government Interest Free Loan can be used to purchase a new solar system outright or go towards a new system. If you are putting it towards a new system, you will need to pay the difference in costs between the loan amount and the solar system cost.
